

COMP-SCI 5551 (FS16) - Advanced Software Engineering

Tutorial 5 Assignment (Due 09/28/16)

Dayu Wang (59)

Screenshots

The mobile App was built on the platform of **Samsung Galaxy Tab S2 (8")**.

Login Page

The screenshot shows an Android application interface. At the top, a black status bar displays icons for back, home, and recent apps, along with Bluetooth, vibration, Wi-Fi, 12% battery, and the time 3:51 PM. Below the status bar, the app's title bar is light yellow and contains the text "COMP-SCI 5551 (FS16) - Tutorial 5 - Assignment" in red. The main content area has a light yellow background. It features the title "An Android App to get pictures and Wiki introduction for a specific input" in bold black text, followed by "Made by *Dayu Wang* (59)" in red. Below this, there are two input fields: "Username:" and "Password:", each followed by a white text box. At the bottom of the form, there are two buttons: a red "Login" button and a grey "Register" button.

iPhone 7

A white rectangular box for the Apple Lightning to Headphone Jack Adapter. The box features the Apple logo at the top left, followed by the text "Lightning to Headphone Jack Adapter". Below the text is a line drawing of the adapter, which has a Lightning connector on one end and a 3.5mm headphone jack on the other.

The iPhone 7 and iPhone 7 Plus are smartphones designed, developed, and marketed by Apple Inc. They were announced on September 7, 2016, at the Bill Graham Civic Auditorium in San Francisco by Apple CEO Tim Cook, and released on September 16, 2016, succeeding the iPhone 6S and iPhone 6S Plus as the current flagship devices in the iPhone series. Apple also launched the devices in 30 additional countries on September 23, 2016, and will launch in India on October 7, 2016. The iPhone 7's overall design is similar to that of the iPhone 6S, but with new color options, water and dust resistance, a new capacitive home key, and most notably, the removal of the device's 3.5 mm headphone jack (an adapter for attaching wired headphones via the Lightning port, as well as earphones that connect via Lightning, are included with the phone). The devices' internal hardware also received upgrades, including a heterogeneous quad-core system-on-chip with improved system and graphics performance, upgraded cameras (including 12 megapixel rear-facing cameras with optical image stabilization on both models, and an additional telephoto lens on the iPhone 7 Plus model to provide enhanced zoom capabilities).
